TECHNICAL SKILLS

Languages: Java, HTML, CSS, JavaScript, Swift, Python
Framework: SwiftUI, Storyboard
Database: SQL, Firebase, UserDefaults
Developer Tools: Eclipse, Git, GitHub, Visual Studio Code, IntelliJ IDEA, Linux, Xcode
Core Subjects: Data Structures and Algorithms, Computer Networks, Concurrency, Memory Management

EXPERIENCE

Antino Labs — Dec. 2024 – Jan. 2025
Software Development Trainee — *Gurugram, Haryana*

- Designed and developed the app's UI using UIKit, Storyboard, and Xcode, ensuring a visually appealing and user-friendly experience.
- Implemented TableView and CollectionView, breaking them into smaller reusable components using XIB files to improve maintainability and scalability.
- Followed the MVC architecture, keeping the project well-structured and making the code more readable and manageable.
- Worked closely with the team to refine UI/UX elements, debug UI-related issues, and enhance app performance.
- Gained hands-on experience with auto-layout, constraints, and adaptive UI design, making the app responsive across different screen sizes.

PROJECTS

Helping Hands — Sept. 2022 – Dec. 2022

- Created a user-friendly website for **Kasturba Gandhi National Memorial Trust**, Delhi. The site offers detailed information about the NGO, its services, gallery, and Board of Trustees.
- Technologies Used: HTML, CSS
- Project-Link | GitHub-Repo.

iWeather — Feb. 2023 – Apr. 2023

- Developed a weather application that provides users with real-time weather data and forecasts. Leveraged the OpenWeather API to deliver location-based weather information seamlessly.
- Technologies Used: Swift, SwiftUI, Xcode
- GitHub-Repo.

Ping-Me — June 2023 – Aug. 2023

- Built a real-time chat application for iOS using SwiftUI for the front-end and Firebase for back-end services, with seamless communication between users.
- Implemented features such as secure login, sending and receiving messages, enhancing the application's functionality and usability.
- Technologies Used: Swift, SwiftUI, Xcode, Firebase Authentication, Firebase's real-time database.
- GitHub-Repo.

Grocery Store — Feb. 2025 – Mar. 2025

- Developed Sign In, Sign Up, Email Verification and OTP Verification screens using Swift for an iOS application.
- Integrated backend APIs hosted on Render (grocery-backend-t65p.onrender.com) for authentication and user management.
- Built UI based on company-provided mockups and ensured smooth navigation flow.
- Technologies Used: Swift, SwiftUI, Xcode, Render.
- GitHub-Repo.

EDUCATION

Jagan Institute of Management Studies/GGSIPU — New Delhi, India
Master's in Computer Applications — *Sept. 2022 – Aug. 2024*

Institute of Management and Research, Bharati Vidyapeeth — New Delhi, India
Bachelor's in Computer Applications — *Aug. 2019 – May 2022*
